I have a large Excel(xlsx and xls) file with multiple sheet and I need convert it to RDD or Dataframe so that it can be joined to other dataframe later. I was thinking of using Apache POI and save it as a CSV and then read csv in dataframe.But if there is any libraries or API that can help in this Process would be easy. Any help is highly appreciated.

Hi Claire, This depends on the questionnaire. If e.g. the questionnaire has say 10 questions and so for each student the total score is between 0 and 10 (where 1 codes a response that is positive to that teaching method 1 and -1 codes for a response that is positive for teaching method 2), then you could use a one sample t test (essentially equivalent to the two paired sample test) against the ...
