Geometry Circles In The Coordinate
Transcript: Circles in the Coordinate Plane In the previous video I suggested that a circle centered at the origin with a radius of r would have the formula x squared + y squared = r squared. We concluded this by thinking about distance in the x-y plane, and in particular thinking about the application of the Pythagorean theorem to the coordinate plane.

Coordinate Geometry: Circles in the Coordinate Plane ...
Coordinate Geometry: Circles. Consider a circle of radius r, centred at the point O(a,b), as in Figure 1. Figure 1. The circle $(x - a)^2 + (y - b)^2 = r^2$. Consider also a point P with coordinates (x,y) on the circle. Then the distance OP is r.
