Behavioral-based Interview Technique and STAR formula answers. A structured interview procedure with a particular method of questing techniques and analysis of responses A method used to analyze the skills and qualities required for success in the job and identify candidates that have demonstrated these skills in past experiences.

Behavioral-based Interview Technique and STAR formula answers
Applying this formula to a convex polygon with 1,000 sides, we see that the number of diagonals = 498,500. In addition to providing the answer, Chris pointed out that the problem need not be restricted to regular polygons, as it was when posted. This formula works for all convex polygons, regular or not. Thanks, Chris.
